

IN THE CLAIMS

Please amend claim 1 by rewriting the same as follows:

1. (Amended) An apparatus for controlling display of an electrical program guide, comprising:

[a] broadcast program information storage means for storing, as broadcast information, the information relative to broadcast programs extracted from predetermined positions of video signals;

[a] recorded program information storage means for storing, as recorded program information, the information relative to the broadcast programs recorded in recording media; and

[a] display control means capable of displaying simultaneously, as an electrical program guide to provide the program-related information, the program information relative to both of the broadcast programs and the recorded programs on the basis of the broadcast program information stored in said broadcast program information storage means and also the recorded program information stored in said recorded program information storage means whereby both broadcast program information and recorded program information are processable by a single electrical program guide function so as to enable a user to select for more than one program the broadcast information and recorded program information associated therewith by activating the desired single electrical program guide function only once.--

Claim 2, line 2, after "displaying" insert --
simultaneously--.

Please amend claim 4 by rewriting the same as follows:

Sub
C31

--4. (Amended) A method of controlling display of an electrical program guide [by] comprising the steps of:
storing, as broadcast program information, the information relative to broadcast programs extracted from predetermined positions of [the] video signals;
storing, as recorded program information, the information relative to the broadcast programs recorded in recording media; and
displaying simultaneously, as an electrical program guide to provide the program-related information, the program information relative to both of the broadcast programs and the recorded programs on the basis of the stored broadcast program information and also the stored recorded program information whereby both broadcast program information and recorded program information are processable by a single electrical program guide function so as to enable a user to select for more than one program the broadcast information and recorded program information associated therewith by activating the desired single electrical program guide function only once.--
